

Ultrasound cut-off values for intima-media thickness of temporal, facial and axillary arteries in giant cell arteritis

Valentin S. Schäfer¹, Aaron Juche¹, Sofia Ramiro², Andreas Krause¹ and Wolfgang A. Schmidt¹

Rheumatology 2017. doi:10.1093/rheumatology/kex143

An error in table 1 of this paper has now been corrected. The cut-off value for the axillary artery should be 1.0mm on right side, left side and both sides. This has now been corrected both online and in print.
